37 Once the script runs under user id on CWP7 the test script we can test others.

46 http://www7.pos2net.com/dwos-bin/test.pl
47
48 Problems so far, on CWP CWP7.admin the scripts run, but there are permission issues
49 ... where they don't read and write and perform properly the same as Production and
50 ... recreation on Cpanel CentoOS7.
51
52 You can not add an item to a shopping cart like production and copy of production on
53 ... upgrade22cpanel.netstores.
54
55 This is probably be due to some setting / ownership issue on CWP CWP7 vs Cpanel in the
56 ... custom suexec of Cpanel AND the httpd.conf file.
```

```
48
49 So, I do have server wide scripts performing half way under group nobody, but need to
... have configured to run under their suexec id in the hidden from ftp users directory /
