#### Title and Abstract

Title FORMULASI SABUN CAIR EKSTRAK DAUN KECOMBRANG SEBAGAI ANTIKEPUTIHAN

Abstract *Etlingera elatior contains chemical compounds that prevent and treat leucorrhoea. However, they are used conventionally, and therefore, they are less effective and efficient. The purpose of this study was to formulate the liquid soap extract of Kecombrang Leaf (*Etlingera elatior*) and determine the stability of its physical quality and activity as an anti-vaginal discharge. The study uses dried simplicia of Kecombrang leaves extracted by the maceration method with ethanol 96%. It was formulated into liquid soap with a concentration variation of 6.25% and 8.75%. Each formula was evaluated for physical quality, microorganism contamination, and activity tests before and after the storage are accelerated. The results obtained by Etlingera Folium extract could be formulated into liquid soap with a concentration of 6.25% and 8.75%. The stability test results are accelerated, and each concentration meets the requirements of the organoleptic, foam resistance, and pH tests. Microorganism contamination test results also meet the needs of SNI & BPOM and have anti-vaginal discharge activity. The liquid soap preparation of 8.75% has an activity greater than the concentration of 6.25%.*

**Keywords:** *Candida albicans, Kecombrang leaves, Physical quality, Liquid soap*

*Etlingera elatior* mengandung senyawa kimia yang terbukti berfungsi mencegah dan mengobati penyakit keputihan tetapi penggunaannya masih secara tradisional sehingga kurang efektif dan efisien digunakan. Tujuan penelitian adalah untuk memformulasikan sediaan sabun cair ekstrak Daun Kecombrang (*Etlingera elatior*), mengetahui ketabilan mutu fisik dan aktivitas sebagai anti keputihan. Penelitian ini menggunakan simpilisia kering Daun Kecombrang yang diekstraksi dengan metode maserasi dengan etanol 96%, diformulasikan menjadi sabun cair dengan variasi konsentrasi 6,25 % dan 8,75%. Masing-masing formula kemudian dievaluasi uji mutu fisik, uji cemaran mikroorganisme dan uji aktivitas sebelum dan setelah penyimpanan dipercepat. Hasil yang diperoleh ekstrak *Etlingera Folium* dapat diformulasikan menjadi sabun cair dengan konsentrasi 6,25 % dan 8,75%. Hasil pengujian ketabilan dipercepat, masing-masing konsentrasi memenuhi persyaratan uji organoleptis, uji ketahanan busa dan uji pH. Hasil uji cemaran mikroorganisme juga memenuhi syarat SNI & BPOM serta memiliki aktivitas sebagai anti keputihan, dimana sediaan sabun cair 8,75 % memiliki aktivitas yang lebih besar dari konsentrasi 6,25 %.

**Kata Kunci :** *Candida albicans, Daun Kecombrang, Mutu fisik, Sabun cair*
